SUMMARY

I am a Computer Systems Engineering student at Mehran University of Engineering & Technology with a strong passion for Embedded Systems and the Internet of Things (IoT). I possess solid programming skills in Python, C++, Java, and MATLAB, complemented by hands-on experience in Arduino systems and basic work with ESP32 and Raspberry Pi Pico. Currently, I am focused on mastering LoRaWAN networking and IoT communication to build innovative embedded solutions.

EDUCATION

Bachelor of Computer Systems Engineering

Mehran University of Engineering & Technology

08/2024 - 05/2028 (Expected) Hyderabad, Sindh, Pakistan

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 – Certified AI Foundations Associate

Certified AI Foundations Associate from Oracle Cloud Infrastructure, validating foundational knowledge in AI

Cambridge International Qualification

Qualification from Cambridge International demonstrating competency in various academic subjects

SKILLS

C/C++	Java	SQL	OOP
-----	-----	----	-----
DSA	MATLAB	Arduino	IOT
-----	-----	-----	----
ORACLE Cloud			

PROJECTS

Hospital Management Reminder System

C++ project focusing on patient management and appointment scheduling

- Developed a console-based system to manage patient records and appointment reminders
- Implemented file handling for storing and retrieving data efficiently
- Improved organization and tracking of scheduling information

Water Overflow Control System

Arduino project aimed at managing water levels to prevent overflow

- Designed an automated system to detect water levels and prevent overflow
- Used sensors and microcontroller programming for real-time monitoring
- Reduced water wastage through simple automation
